(Whereupon, the following is an excerpt from  
4/27/2006 in In re Enron Corp., et al, Case No.  
01-16034.)

JUDGE GONZALEZ: We will then proceed to the  
matter that was scheduled for 10:10, and that is the  
various motions to dismiss. One is an amended motion  
filed to dismiss the adversary proceeding, and the  
other is a motion by the National Australia Bank to  
dismiss.

I am going to take a very brief recess. If you  
haven't given your appearances, please do so. I will  
return in a few minutes to hear the arguments.

1 (Whereupon, from 10:21 a.m. to 10:23 a.m. a  
2 recess was taken.)

3 JUDGE GONZALEZ: Please be seated.

4 Let's commence then with the argument on the  
5 motion to dismiss.

6 MR. SHIMSHAK: Good morning, Your Honor.  
7 Stephen Shimshak of Paul, Weiss, Rifkind, Wharton &  
8 Garrison. I appear this morning in support of the  
9 motion of Caisse de Depot de Placement du Quebec to  
10 dismiss the Second Cause of Action as to it in the  
11 adversary proceeding of Enron Corp. v. International  
12 Finance Corp., et al.

13 CDP, which is the denomination that I will use  
14 to refer to the client, is an instrument of the  
15 government of the Province of Quebec created to manage  
16 provincial pension funds. Your Honor, also moving to  
17 dismiss on grounds identical to CDP is National  
18 Australian Bank. Mr. Keyes of William & Connolly and  
19 I discussed the procedure this morning, and we agreed  
20 that I would proceed with the argument. Of course, he  
21 has reserved his right to make any additional points  
22 that he wishes. I would suggest that, if he has some  
23 additional comments, they should follow mine and then,  
24 of course, Mr. Magaliff can respond on behalf of  
25 Enron.

1 Your Honor, this motion concerns the Second  
2 Cause of Action in this adversary proceeding, and I  
3 would like to outline for the Court's benefit the  
4 elements of that cause of action and give some  
5 background facts, all, of course, drawn from the  
6 Complaint. For ease of discussion, I did prepare one  
7 demonstrative, which I would like to provide to the  
8 Court. It helps to follow the transaction.

9 JUDGE GONZALEZ: Thank you.

10 MR. SHIMSHAK: Your Honor, in essence the  
11 Complaint concerns aspects of an Asset Securitization  
12 Program, and that is laid out in the chart. As the  
13 structure worked, ENA contributed so-called CLO assets  
14 to a partnership, Holding I LP. An Enron entity  
15 served as the general partnership of that partnership,  
16 and the Complaint alleges the Trust on the left hand  
17 side of the chart served as the limited partnership.

18 In consideration of its interest in the limited  
19 partnership, proceeds of a note issuance by the Trust  
20 flowed into the partnership and up to Enron, and then  
21 the cash flowed from the assets which had been  
22 contributed to the partnership was used to retire the  
23 note obligations.

24 The Complaint alleges in paragraph 32 that in  
25 September of 2000 Enron granted a Put Option to the

1 partnership Holding I LP enabling the partnership to  
2 put the CLO assets to Enron up to an amount of \$113  
3 million under circumstances that were specified in the  
4 put. Count II further alleges that Holding 1 LP  
5 exercised the Put Option, and on or about January 12,  
6 2001, Enron paid \$63 million to Holding LP. It  
7 further alleges that Holding I then transferred the  
8 funds received in the January Put Payment to the CLO  
9 Trust, and the Trust, in turn, transferred these funds  
10 to the parties identified on Exhibit 3 to the  
11 Complaint. Exhibit 3 contains a list of mediate  
12 transferees, including CDP. It does not set forth the  
13 amount that each transferee received, but my  
14 understanding is that CDP received approximately \$11  
15 million.

16 Enron alleges that the January Put Payment to  
17 Holdings LLP constituted a fraudulent conveyance, and  
18 that Enron may recover the fraudulent conveyance from  
19 CDP and others identified solely as mediate  
20 transferees under section 550(a)(2) of the Bankruptcy  
21 Code. So the Second Cause of Action states a cause of  
22 action under section 550(a)(2).

23 The parties are in agreement on what Enron did  
24 not do in its Second Cause of Action and that is that  
25 it did not sue and identify as a Defendant Holding I

1 LP, the party that Enron alleges received the  
2 fraudulent transfer and it, thus, does not seek to  
3 avoid as against Holding I LP, the fraudulent transfer  
4 alleged in count II.

5 CDP and National have moved to dismiss the  
6 Complaint based on the interplay between section 550,  
7 548, and 546(a) of the Bankruptcy Code. Specifically,  
8 CDP maintains that under section 550(a) of the  
9 Bankruptcy Code, Enron cannot proceed on a 550(a)  
10 recovery cause of action against CDP as a mediate  
11 transferee without first avoiding the transfers to  
12 Holding I LP.

13 We further maintain that though nothing  
14 prevented Enron from proceeding against Holding I LP,  
15 it cannot do so now due to the operation of section  
16 546(a). The time to avoid to create avoidance actions  
17 against Holding I LP expired on the second anniversary  
18 of the filing of the case, December 2, 2003.

19 Finally, we will respond to an argument made in  
20 Enron's reply in which it went outside the letter of  
21 the Complaint and essentially asked this Court to take  
22 judicial notice of the fact that Enron has caused the  
23 dissolution of Holding I LP and that it no longer  
24 exists. While CDP does not believe that the fact of  
25 the dissolution proceeding should have any bearing on

1 its motion to dismiss, a review of the docket in this  
2 case in public filings in Delaware makes clear that  
3 the decision to proceed, as Enron did, was consciously  
4 made and that Enron should bear the consequences of  
5 that decision relating to the dissolution of Holding I  
6 LP.

7 At the heart of this motion, Your Honor, lies  
8 the issue of the construction and application of  
9 section 550(a) of the Bankruptcy Code. That  
10 provision, we maintain, is straightforward. It  
11 states, except as otherwise provided in this section,  
12 to the extent that a transfer is avoided under  
13 sections 544, 545, 547, 548, 549, 553(b), or 724(a) of  
14 this title, the Trustee may recover the property or  
15 the value transferred from the initial transferee for  
16 any immediate or mediate transferee.

17 As Colliers puts it in its explanation of  
18 section 550, the Bankruptcy Code permits a trustee or  
19 a debtor-in-possession after avoidance of a transfer  
20 under the trustee's avoiding powers, to recover the  
21 property transferred or the value of the property  
22 transferred.

23 The legislative history of section 550(a) is  
24 also informative. It begins, section 550 prescribes  
25 the liability of a transferee of an avoided transfer

1 and annunciates the separation between the concepts of  
2 avoiding a transfer and recovering from the  
3 transferee. Subsection (a) permits the trustee to  
4 recover from the initial transferee of an avoided  
5 transfer -- note that word -- or from any immediate or  
6 mediate transferee of the initial transferee.

7         The plain meaning of the statute makes clear  
8 that avoidance must perceive the ability to recover  
9 under section 550. Cases adopting this construction,  
10 which I will discuss in a moment, point to another  
11 feature of section 550 to bolster this conclusion and  
12 that is subsection 550(f). That provision creates a  
13 separate statute of limitations for the recovery of an  
14 avoided transfer consistent with the notion of a  
15 separation between avoidance and recovery. That  
16 provision provides for a one-year statute of  
17 limitation after the avoidance of the transfer for  
18 which recovery is sought.

19         The briefs make clear that the caselaw on the  
20 construction of 550(a) devise with no law squarely on  
21 point in this jurisdiction. There are two circuit  
22 level decisions. One is a decision of the Tenth  
23 Circuit, the Slack-Horner Foundries decision, which  
24 goes our way; and an Eleventh Circuit decision IBT  
25 International, which goes Enron's way.

1           The decisions in our favor, and they are  
2 identified in our brief, particularly Slack-Horner and  
3 Trans-End Tech, treat this matter straightforwardly  
4 finding in the plain meaning of the statute and the  
5 supporting structure, including section 550(f), the  
6 outcome that requires the avoidance of the transfer  
7 against the initial transferee as a precursor to suing  
8 subsequent transferee.

9           Let me address the rationale of the decisions  
10 on the other side, and what I believe are their  
11 analytical infirmities when measured against the plain  
12 meaning of the statute and the analysis that construes  
13 the cases as we urge.

14           First, there are a group of cases and the most  
15 representative is Erin Food Services, which simply  
16 says that in an ipsi dixit fashion that the word  
17 avoided means avoidable without so much as any  
18 analysis. This Court recently addressed the very  
19 distinction between the words avoided and avoidable in  
20 its March 31, 2006 decision in Enron Corp. v. Avenue  
21 Special Situations Fund II, L.P., et al, noting that  
22 section 502(d) explicitly referred to a transfer that  
23 is avoidable, rather than an avoided transfer, and  
24 rejected any argument that 502(d) could not be  
25 asserted until an underlying transfer had been avoided

1 given the letter of the statute.

2 We submit that the cases that do not even  
3 address the letter of the statute, as Erin Food, but  
4 simply misread it to achieve a desired outcome, hardly  
5 merit serious consideration, given the express  
6 statutory language.

7 Other cases combine a dismissive rejection of  
8 the statutory text. Cases like Crafts Plus, Richmond  
9 Produce, and Advanced Telecomm, simply recognizes that  
10 transfers may be avoided only in part and that only  
11 the avoided portion of a transfer is recoverable or  
12 that the statute contains no language that suggest  
13 that recovery from a mediate transferee is in any way  
14 dependent upon prior action or recovery against the  
15 initial transferee, essentially disregarding the plain  
16 meaning or, alternatively, they revert to a further  
17 passage of legislative history. That legislative  
18 history is, at least on those courts that attempt an  
19 analysis of section 55(a), what they all hang their  
20 hat on, there is a sentence following the passage that  
21 I read earlier, which says the words to the extent  
22 that and that lead to this subsection are designed to  
23 incorporate the protections of transferees found in 11  
24 U.S.C. sections 549(b) and 548(c). In that language,  
25 they find some limitation on application or a plain

1 meaning and reading of section 550(a) that permits the  
2 notion that an avoidable transfer suffices for  
3 purposes of imposing liability on subsequent  
4 transferees.

5 That logical leap is, in fact, a complete  
6 nonsecretor. Each of 549(b) and 548(c) imposed a  
7 limit on the avoidance powers. For example, in  
8 548(c), to the extent that a transferee gave value and  
9 in good faith, the transfer can't be avoided.

10 JUDGE GONZALEZ: Go back for a moment. If you  
11 did not have to avoid it first and it was read as  
12 voidable, when under those circumstances would the  
13 statute of limitations ever run on recovery?

14 MR. SHIMSHAK: This is precisely the argument  
15 that is made under section 550(f), that that  
16 construction of the statute, one which said it was  
17 avoidable, would render 550(f) superfluous and the  
18 existence of 550(f) and the existence of the need to  
19 have a transaction avoided and then the statute of  
20 limitations commence is further evidence of Congress'  
21 interpretation or objective in 550(a). It would have  
22 precisely the effect Your Honor indicated rendering  
23 550(b) nugatory.

24 But let me go back to this 548(c) argument and  
25 our language from the legislative history, the fact

1 that a certain portion of a transaction may be  
2 insulated carries with it the converse, that the  
3 unprotected portion of the transfer must be avoided  
4 before it can be sought from a subsequent transferee.  
5 The attempt to use this language to get out from under  
6 section 550 is simply unavailing and the decisions  
7 that rely on it carry no logical weight.

8 Finally, there is I think at least a bit of  
9 intellectual honesty when one finally reaches the  
10 level of the Eleventh Circuit decision in  
11 International Administrative Services. There the  
12 Court, I think, is straining to produce a  
13 result-oriented decision and to undo a scheme in which  
14 an individual had arranged a series of transfers to  
15 try to move assets farther and farther away from the  
16 estate and said, quote, we are mindful that our  
17 construction of 550(a) does not embrace us a strict  
18 construction, but it went on to say that strict  
19 interpretation of the statute would, quote, produce a  
20 harsh and inflexible result that runs counterintuitive  
21 to the nature of avoidance actions. The Court then  
22 went to postulate as a harm a series of transfers  
23 would insulate a transferee from liability. This  
24 analysis falls apart at several levels.

25 First, the Court offers no explanation for why

1 a result which conforms with the letter of the  
2 Bankruptcy Code produces a harsh or inflexible result.  
3 One could just as readily argue that the assertion of  
4 546(a) statute of limitations eliminating avoidance  
5 causes of action for the failure to bring them within  
6 the two-year period specified by the statute would  
7 produce a harsh and inflexible result and that it  
8 would be a better world if avoidance actions could be  
9 brought any time, but that is simply not the case.  
10 Congress has imposed a structure that imposes time  
11 limits and procedures under which avoidance actions  
12 should be brought.

13 Second, the parade of horrors concerning a  
14 string of subsequent transferees hardly makes sense.  
15 Section 550 imposes, after all, strict liability on  
16 the initial transferee, and subsequent transferees are  
17 only insulated from attack to the extent that they  
18 gave value and gave value in good faith. The kind of  
19 scheme that the Eleventh Circuit postulated, frankly,  
20 would not work in the real world.

21 Finally, Enron argues that it can maintain this  
22 cause of action even without a Defendant, even without  
23 the initial transferee as a Defendant, because, as  
24 Enron says, it can establish the requisite elements of  
25 section 548 of the Bankruptcy Code without Holding I

1 LP being a part to this action. This amounts to the  
2 contention that no section 548 cause of action needs  
3 to be brought at all, and that to recover under  
4 section 550 Enron only needs to establish the elements  
5 of a fraudulent transfer as an evidentiary fact, not  
6 as a cause of action brought against a defendant.

7           How would this work in practice? Without the  
8 initial transferee, for example, without a defendant,  
9 who would challenge the fraudulent conveyance  
10 allegations asserted in section 548? Who would have  
11 the ability to assert the protective provisions of  
12 section 548(c)? The media transferees? Certainly  
13 there are practical and potentially substantive  
14 questions about the abilities of these parties, who  
15 are liable, after all, only on a separate cause of  
16 action under section 550, to determine whether or not  
17 the debtor has satisfied the elements of a fraudulent  
18 conveyance claim.

19           In the absence of an initial transferee, what  
20 would be the result? Would there always be a default  
21 in which the fraudulent conveyance claim was  
22 established by default for want of a defendant? It  
23 seems doubtful that Congress intended such an unequal  
24 process. While certainly the result might occur in  
25 some circumstances and conceivably even in this

1 circumstance, given that the partnership is a defunct  
2 enterprise, it is one thing to have that outcome under  
3 the peculiar facts of a particular circumstance and  
4 quite another to establish a legal principle that in  
5 essence a trustee or debtor-in-possession has the  
6 option of proceeding under the statute and the letter  
7 of the statute against a defendant or, alternatively,  
8 establishing the claim as an evidentiary fact and a  
9 cause of action against a subsequent transferee. I  
10 submit that such an outcome is wholly inconsistent  
11 with section 546(a), section 548, and section 7001 of  
12 the Bankruptcy Code, which contemplates an adversary  
13 proceeding to avoid a transfer, which means a  
14 plaintiff and a defendant.

15 Let's talk, finally, about what really happened  
16 here and why Enron did not sue Holding I LP. I kept  
17 going over this in my mind as I read the concluding  
18 portion of Enron's reply in which they raise the issue  
19 of the dissolved entity and the fact that the  
20 Defendant doesn't exist. I kept going over it in my  
21 mind because of my experience. As the Court knows, in  
22 another capacity, my firm represents Citigroup in the  
23 Mega Complaint. In the Mega Complaint Enron has  
24 scrupulously named every defendant and every initial  
25 transferee in every transaction, including entities

1 that were subject to Enron's control. In the first  
2 cause of action in this very complaint, Enron brought  
3 a 548 cause of action against the initial transferee.

4 So what was special about this circumstance?  
5 Why was Holding I LP left out? So I went back to the  
6 docket in this case and the reason became apparent.  
7 Enron did not name Holding I LP, because a week before  
8 the filing of the adversary proceeding on November 14,  
9 2003, Enron filed a motion in this Court seeking  
10 authority under section C-363 of the Bankruptcy Code  
11 to dissolve Holding I LP in connection with the  
12 disposition of certain assets. So at the time that  
13 Enron filed the Complaint, it knew that this entity  
14 that was the proper defendant to the adversary  
15 proceeding was going to be the subject of dissolution  
16 procedures.

17 This Court approved the sale of a participation  
18 interest of certain other assets to Special Situations  
19 Investing Group on December 18, 2003, two weeks after  
20 the statutory deadline for filing a claim against  
21 Holding I LP as initial transferee. Paragraph 8 of  
22 the sale order authorized the dissolution of Holding I  
23 LP, and some two weeks later Enron filed in Delaware a  
24 certificate of cancellation which terminated the  
25 existence of the partnership. I should add that

1 cancellation, which does have the effect of  
2 terminating the existence of the entity, did not even  
3 appear to be a requirement of the order which only  
4 directed dissolution; and under Delaware law, as in  
5 most jurisdictions, a limited partnership in  
6 dissolution goes into a winding-up phase, a period in  
7 which it can continue to sue and to be sued. For Your  
8 Honor's benefit, I cite you to chapter 17/803 of the  
9 Delaware statutes, which specifies the procedures and  
10 the powers of an entity in dissolution. Cancellation,  
11 not dissolution, terminates the partnership's  
12 existence.

13           Thus, Enron could have complied with paragraph  
14 8 of the order without cancelling the limited  
15 partnership's existence and without eliminating the  
16 limited partnership as the Defendant for 548 purposes.  
17 Though certainly, I would add, the absence of a  
18 pending claim against a partnership in dissolution  
19 must have had the effect of easing the fiduciary  
20 burden of whoever was in charge of the dissolution of  
21 that partnership, because a provision must be made for  
22 all claims in a partnership in dissolution and the  
23 absence of the claim seemingly eliminated that burden.

24           These facts regarding the dissolution of the  
25 partnership are all derived from documents on file

1 with this Court or otherwise publicly available. What  
2 is their significance? They make clear that the  
3 decision not to pursue Holding I LP under section 548  
4 was a conscious one, one made through the exercise of  
5 Enron's business judgment and not the result of  
6 inadvertence, excusable neglect, or hardship. While  
7 we believe that section 550 and its relationship to  
8 548 and 546 are clear on their face, no justification  
9 here exists for any equitable exception or loss on the  
10 statute under these facts.

11 For all of these reasons, Your Honor, we  
12 believe that count II of the Complaint should be  
13 dismissed as to CDP, and we ask this Court to enter an  
14 order accordingly.

15 JUDGE GONZALEZ: Is there anyone else in  
16 support of the motions to dismiss?

17 MR. KEYES: Yes, Your Honor. Andrew Keyes on  
18 behalf of the Defendant National Australia Bank.

19 I would simply echo the argument of  
20 Mr. Shimshak on behalf of the other Defendant that has  
21 made the same motion to dismiss, and I would reserve  
22 my right to respond to Mr. Magaliff in rebuttal.

23 JUDGE GONZALEZ: All right. Thank you.  
24 The Debtor.

25 MR. MAGALIFF: Good morning, Judge. Howard

1 Magaliff from Togut, Segal & Segal on behalf of Enron.

2           You may recall that we were here about  
3 two weeks ago on another series of motions to dismiss  
4 brought in this same case on Monday, April 10th, by a  
5 number of other Defendants on slightly different  
6 theories.

7           The chart that Mr. Shimshak handed up is  
8 actually very helpful, because what it shows is that  
9 at the end of the day this is simply another one of  
10 Enron's very, very convoluted deals. All of the  
11 entities were Enron entities. We know what was done.  
12 We don't know why it was done, but we do know that all  
13 of these various entities were simply pass-through  
14 entities to get the money from one place to another,  
15 namely the Defendants in these actions.

16           To address a question that you raised in  
17 Mr. Shimshak's presentation about the interplay of the  
18 various statutes of limitations, I don't believe that  
19 the 550(f) statute of limitations and the 546(a)  
20 statute of limitations are in any way inconsistent,  
21 nor is it necessary, as practice has demonstrated time  
22 and again, that you first bring an adversary  
23 proceeding to avoid a transfer and then once a  
24 judgment has been rendered, bring a second adversary  
25 proceeding against immediate or mediate transferee to

1 recover.

2 As an example analytically, if you are in the  
3 middle of discovery in a 548 fraudulent conveyance  
4 action and you learn about another transferee that you  
5 didn't know at the time that you brought the action,  
6 it is entirely appropriate to complete the first  
7 action, obtain a judgment, and then commence another  
8 action under 550 against the new transferee that you  
9 had discovered. But there are scores and scores of  
10 cases, Your Honor, where Plaintiffs, including Enron,  
11 seek to both avoid the transfer and recover from  
12 initial and subsequent transferees.

13 The commercial paper case is a perfect example.  
14 We sued almost 200 different Defendants, most of whom  
15 have asserted that they were subsequent transferees,  
16 or conduits, or had good faith defenses, or whatever,  
17 and there has been no serious suggestion that we  
18 bifurcate those actions to sue only the three dealers,  
19 obtain judgments against them as initial transferees,  
20 and then bring separate actions.

21 I think what 550 does is provide an outside  
22 limitation in the event that you seek to bring two  
23 actions. It doesn't mandate it, and I think that they  
24 are entirely consistent.

25 JUDGE GONZALEZ: In the commercial paper are

1 there any of these Defendants that you refer to  
2 recipients of payments from an entity that you also  
3 didn't bring the action against?

4 MR. MAGALIFF: Not to my knowledge.  
5 Ultimately, Judge, as Mr. Shimshak has pointed out,  
6 what these particular motions to dismiss turn on is  
7 the distinction between avoided and avoidable as used  
8 in section 548. The briefing is very comprehensive.  
9 Mr. Shimshak gave a very comprehensive presentation,  
10 and I think for the most part has fairly extracted  
11 from the pleadings the positions of Enron and the  
12 positions of the Defendants.

13 Whether or not you ultimately decide to follow  
14 the decisions in Slack-Horner and Trans-End or the  
15 equally well reasoned decisions in International  
16 Administrative Services, Advanced Telecomm, Richmond  
17 Produce, and a number of the other decisions, such as  
18 National Audit Defense Network, Imperial Corporation  
19 of America v. Durkin -- I have citations, if you would  
20 like them -- we do agree that it is necessary to  
21 establish that you have an avoidable transfer. We  
22 pled that in the complaint in paragraphs 47, 49, and  
23 51 through 54. We pled all of the elements that are  
24 necessary to establish that the transfer to Holding I  
25 LP was constructively fraudulent.

1 Mr. Shimshak has analogized this case to the  
2 hundreds of transfers in International Administrative  
3 Services seeking to draw a difference, but I would  
4 submit, Your Honor, that even though there were not  
5 hundreds of transfers among 23 different entities,  
6 when you look at this very graphic chart in particular  
7 that Mr. Shimshak has handed up, what you see are  
8 Enron entities all over the page and a flow of funds  
9 from entity through entity.

10 I think that the decisions of the Court in  
11 Richmond Produce and Advanced Telecomm and the cases  
12 that Enron has cited to support the construction of  
13 the statute that avoidable is more in line with the  
14 policy of the Bankruptcy Code, rather than the more  
15 restrictive reading of avoided, I think there is ample  
16 authority for you to conclude that under these  
17 particular circumstances in this particular fact  
18 pattern it would not have been necessary for Enron to  
19 sue its wholly-owned entity for the sole purpose of  
20 being able to consent to the entry of a judgment that  
21 the initial transfer was constructively fraudulent as  
22 a precursor to suing the entities that got the money.

23 JUDGE GONZALEZ: With respect to the entities  
24 that you say got the money, what benefit did Holding 1  
25 LP receive when the monies flowed to the Defendants

1 before me today?

2 MR. MAGALIFF: To my knowledge, Your Honor,  
3 absolutely nothing. All the information that we have  
4 been able to obtain to date -- and there has been no  
5 discovery, by the way, with the Defendants, this is  
6 all information that we have developed from Enron's  
7 records in such condition as they exist -- that  
8 Holding I LP was set up simply as a vehicle in which  
9 to park the CLO assets. I can't tell you why the  
10 assets were not put directly into the Trust. This  
11 goes back to my initial comment that we don't know why  
12 it was structured like this, but economically the  
13 Trust was the limited partner of Holding I LP and had  
14 all the economic interest, which is why all of the  
15 money that came into Holding I LP immediately went out  
16 to the Trust and thence to the Defendants in this  
17 action. We can trace the dollars in and the dollars  
18 out.

19 I am fairly certain and, in fact, almost  
20 positive, that should we go to trial on this, we will  
21 be able to demonstrate that Holding I LP retained no  
22 money for itself because there was no reason for it to  
23 retain money. It had no interest other than as a  
24 vehicle to hold the portfolio assets.

25 JUDGE GONZALEZ: All right. Thank you.

1 MR. MAGALIFF: If you have no further  
2 questions, Your Honor, I believe that I am finished  
3 with my presentation.

4 MS. SHIMSHAK: I have a few brief remarks in  
5 response.

6 JUDGE GONZALEZ: All right. Go ahead.

7 MR. SHIMSHAK: First of all, Mr. Magaliff  
8 recited that in a myriad of instances the avoidance  
9 actions and the 550 actions are brought in a single  
10 proceeding, rather in two separate proceedings. I  
11 certainly don't want to get metaphysical, but the  
12 distinguishing feature between the circumstance that  
13 he described and this case is that in those cases  
14 there is an avoidance action against the initial  
15 transferee as well as a cause of action under 550  
16 stated against subsequent transferees. That  
17 possibility will never arise here, because the  
18 Defendant by the very terms of Complaint, the  
19 recipient of the 548 fraudulent conveyance is not a  
20 party to this accident.

21 Second, Mr. Magaliff argued that these were all  
22 pass-through structures and that money flowed to the  
23 ultimate noteholders, but, again, there is no argument  
24 that these entities are in essence the initial  
25 transferees. Quite the contrary. The allegations of

1 the Complaint accept the structure and accept the  
2 separateness of all of these entities and identify the  
3 ultimate recipients as subsequent transferees.

4 Third, Mr. Magaliff postulates that what would  
5 have been the point; Holding I LP would have simply  
6 caused the entry of a judgment for fraudulent  
7 conveyance anyway. This has been a dimension of the  
8 Complaint, which I haven't touched upon and about  
9 Enron conduct here, but I say in response to that, not  
10 so fast. Holding GP, the Enron creature that was  
11 acting as the general partnership of that partnership,  
12 owed a fiduciary duty to the limited partnership to  
13 CLO Trust and ultimately to the beneficiaries of the  
14 of the notes issued by CLO Trust. CLO Trust was the  
15 limited partner.

16 I wonder whether Enron, frankly, in the  
17 discharge of its fiduciary duty could simply concede  
18 that a fraudulent conveyance had taken place. That is  
19 one of the difficulties here without having a  
20 defendant or any provision for a defendant to  
21 safeguard the interests of the limited partner and  
22 interests of the partnership in the fraudulent  
23 conveyance claim that is alleged.

24 So I say it is by no means a foregone  
25 conclusion that there would have been a mechanical

1 default or a confession to a default judgment, not if  
2 those entities that were involved are discharging  
3 their fiduciary responsibilities.

4 JUDGE GONZALEZ: Is there anyone else?

5 (Whereupon, no response was heard.)

6 JUDGE GONZALEZ: All right. Thank you. I do  
7 want to ask one question that I think is obvious, but  
8 I will ask it anyway and I will ask for a response.

9 Mr. Magaliff referenced a motion that was heard  
10 a few weeks ago. If that motion that was heard a few  
11 weeks ago were granted, I presume that there is no  
12 reason to reach any of the issues in this case?

13 MR. SHIMSHAK: I am not familiar with that  
14 motion, Your Honor, quite frankly. We weren't covered  
15 by it.

16 JUDGE GONZALEZ: It is the safe harbor 546  
17 issue with respect to the Defendants being the various  
18 transferees, but if the motions were granted, I  
19 presume for Holding I LP the argument would be, even  
20 if it then were named, it would have the safe harbor  
21 defense?

22 MR. SHIMSHAK: Your Honor, I would say this,  
23 not being familiar with it --

24 JUDGE GONZALEZ: I will ask Mr. Magaliff,  
25 because I think he is familiar with it: what would

1 then be the Plaintiff's position, if that motion were  
2 granted?

3 MR. MAGALIFF: I think, Your Honor, if that  
4 motion were granted, it would not affect these  
5 Defendants and I will tell you why. The issue that  
6 was raised by that group of Defendants was that Enron,  
7 in essence, repurchased notes, which, as you are very  
8 well aware, is at the heart of the whole 546  
9 settlement payment safe harbor defense that we have  
10 argued in a number of cases. They were saying that it  
11 was the completion of a securities transaction or  
12 settlement, if you will.

13 We didn't sue National Australia Bank and CDP  
14 on the basis of buying back notes. These were  
15 straight, fraudulent transfers. It was a fraudulent  
16 transfer to Holding I LP, because Enron received no  
17 consideration for the granting of put.

18 JUDGE GONZALEZ: You have jumped ahead of what  
19 I was focused on. Would Holding LP in the context of  
20 an avoidance action brought against Holding I LP been  
21 able to raise the 546(e) safe harbor, obviously, as a  
22 defense?

23 MR. MAGALIFF: No. There was no securities  
24 type of transaction that occurred, to our knowledge,  
25 between Enron Corp. and Holding I LP. It was simply

1 the grant of a Put Option in return for no  
2 consideration. Then Holding I calling the put and  
3 Enron transferring \$63-some-odd million to the  
4 partnership.

5 If you have no further questions, Your Honor,  
6 we appreciate the time.

7 JUDGE GONZALEZ: All right. Thank you.

8 The next matter is a decision to be rendered at  
9 11:00. I think it is more likely that I will return  
10 to the bench at approximately 11:15. So with respect  
11 to that matter, if the calendar is correct that I am  
12 looking at, it would be the GE Capital matter.

13 Give your appearances and I expect that I  
14 should return to the bench no sooner than 11:15.

15 (Whereupon, from 11:02 a.m. to 11:16 a.m. a  
16 recess was taken.)
